Build once and deliver everywhere with hundreds of UI controls including grids, charts, spreadsheets, and reports, spanning all the Microsoft .NET platforms. Code in confidence with award-winning products backed with over two decades of development and world-leading service and support.

Our ongoing commitment to delivering high value products and services has helped us to become recognized as a leader in the component tools industry, and earn the business of many of the world's most prominent organizations. We look forward to working with you and earning your business.

Company and Product Overview

ComponentOne, a division of GrapeCity, provides customers with innovative UI controls, tools, and enterprise-level reporting, analysis, and spreadsheet controls. Develop rich Windows Forms, WPF, ASP.NET, MVC, Silverlight, Windows Store, Windows Phone, Mobile, and ActiveX applications. Spend less time coding and more time focusing on business logic with ComponentOne's flagship products— ComponentOne Studio Enterprise, ActiveReports, and Spread.

Our product line also includes HTML5 tools, LightSwitch extensions, Esri Mapping controls to transform GIS data into business intelligence, and Doc-To-Help—a popular solution for publishing professional-quality user manuals and Help systems. We offer several purchasing options, including individual controls, platform specific studios, and multi-platform suites.

Layout & Docking

Select Customers

For more than 20 years, many of the world's most prominent organizations have relied on ComponentOne, including:

What Customers are Saying

❝ As a developer, I appreciate the flexibility of your products. As a business, we find the export formats and the end user designer to be invaluable. The uniqueness of the ActiveReports products have helped to boost our sales which is always a good thing. ❞

Wendy Mathis, *Software Engineer Knowledge Relay*

❝ I switched to ComponentOne from another vendor's offering and found C1's solution to be just what I needed: fast, lightweight and professional looking while still being easy to learn and use! ❞

Greg Gum, *Founder & Lead Software Engineer, SecuraMail.net*

❝ The only .NET control tools we trust. They scale well and meet all of the needs of our diverse development needs (Web, WinForms, etc.) We have retired all other vendors as a result. ❞

Rick Erickson, *Senior Systems Architect*
